

PROCESS MECHANICAL

PIPING & ERECTION INC.

When We Say We're Full Service, WE MEAN IT.

We provide a turnkey facility piping solution, including process design, rigging and process piping. We have the experience (over 100 major projects) and manpower to meet any textile rental laundry challenge. No one is more qualified to install equipment and piping in your facility. We do all of the work ourselves and do not subcontract. PMP&E has handled projects from Arizona to Canada to the Carolinas and everywhere in between. *Weekend boiler and weekend laundry equipment installations are a specialty.*

- Turnkey Facility Installation • Process Design • Plant Renovations
- Equipment Moving and Installation • Rigging • Process Piping
- Fabrication • Dryer Duct Work • Turnkey Plant Relocations

Mechanical Process Solutions For Textile Laundry Facilities
